

## UQRCS Student Research Tipsheet

This sheet contains some tips and an example to assist research supervisors with completing a 'Research project submission form' to recruit medical students for research projects. The form is available here - <https://medical-school.uq.edu.au/research/student-research-portal/how-post-project-student-research-portal?p=1#1>

- The most applicable research option to tick on this form is 'Student self-guided research'.
- To complete the form you need the project title, synopsis, at least three student learning outcomes and any expected pre-requisite skills you would like the student to have. See an example below:

**Project title:**

A systematic review of factors that influence consumer involvement in rural health practice, research and education.

**Project synopsis:**

There is an increasing push to involve patients and consumers (i.e., patient, carer, family) in healthcare. This systematic review will examine the international evidence on consumer involvement in rural health practice, education and research. It will follow the PRISMA guidelines. Further information about this systematic review can be found in the registered PROSPERO protocol -

[https://www.crd.york.ac.uk/prospERO/display\\_record.php?RecordID=448430](https://www.crd.york.ac.uk/prospERO/display_record.php?RecordID=448430)

**Student learning outcomes:**

Participation in this research will enable students to achieve the following learning outcomes:

1. Learn to undertake systematic searching of the literature.
2. Apply the PRISMA guidelines in practice.
3. Collaborative working skills.

**Pre-requisite skills:**

It is desirable for students participating in this research to have undertaken literature reviews and to have a demonstrated ability to work with others towards a common goal.

Detailed information about involving medical students in your research is available on the UQ Medical School Student Research Portal - <https://medical-school.uq.edu.au/research-portal>

For further queries, supervisors in Toowoomba and Hervey Bay can contact [Dr Priya Martin](#) and supervisors in Rockhampton and Bundaberg can contact [Dr Jordan Fox](#).
